As cold and flu season is upon us, text4baby shared information today from the service’s first-ever interactive educational module, showing how the service can quickly and efficiently gather important data on how moms make choices about taking steps to prevent the flu. As part of HMHB’s special “Update on text4baby” webinar, we described how the interactive flu module was shared with over 100,000 text4baby subscribers in October, and was able to engage subscribers within 48 hours, showing that users are reading the texts and that there are opportunities to further engage through this medium. More than 30,000 subscribers responded. Of those who responded, 12,755 (39.8%) reported that they had already received the flu shot this season; 9,470 (29.5%) responded that they were planning to get a flu shot, while 9,859 (31%) replied that they were not planning to get a flu shot. The flu module contributes to the growing body of information about how text4baby users interact with the service and their health beliefs and behaviors. Sarah Ingersoll, Campaign Director
National Healthy Mothers, Healthy Babies Coalition

Welcome New Partners!
This week, we welcome the following new partners:

- Community Care Connections
- Aetna Better Health (Pennsylvania)
We greatly appreciate your commitment to spreading the word about text4baby! For a complete list of partners, visit: http://text4baby.org/index.php/partner

Subscriber Update
Text4baby has now enrolled 258,993 individuals! Ninety-six percent of text4baby users who responded to a survey (n=11,663) reported that they would recommend the service to a friend.

The chart above shows the total number of unique users who have enrolled in text4baby per state since launch on 2/2/10. Click here to view all states and for more information on how this chart is calculated.
The chart above shows the total number of unique users who have enrolled in text4baby, per state, adjusted to account for the estimated number of pregnancies and infants in each state, since launch on 2/2/10. Click [here](#) for more information on how the chart is calculated.

**Partner Spotlight**
Blue Cross and Blue Shield of Louisiana, the state’s oldest and largest health insurer, is using a variety of methods to spread the word about the benefits of text4baby. Since announcing the partnership in September 2011, Blue Cross has promoted the service on the homepage of its website; in the media via a press release and public service announcements; with articles in its weekly and monthly stakeholder newsletters; through social media outlets such as Facebook, Twitter and YouTube; and with web advertising and on-hold messages. The company also encourages doctors who specialize in women’s and infants’ health to promote the service to their patients by providing them with fliers, posters and tear pads. Through its efforts, Blue Cross and Blue Shield of Louisiana has informed people across the state about text4baby and continues to look for new ways to promote the program. For more information about Blue Cross and Blue Shield of Louisiana’s activities, [click here](#).

**Federal Highlight**
Last week, the U.S. Department of Housing and Urban Development (HUD) mailed a letter from the Assistant Secretary for Public and Indian Housing to approximately 4,000 Public Housing Authorities nationwide introducing text4baby as an initiative that is working to ensure the health and well being of children. The letter encouraged the PHAs to post the text4baby flyer included in the mailing and share other text4baby
materials throughout their communities to spread the word about the service with residents of HUD assisted housing. The Department is joining other government agencies, such as the White House Office of Science and Technology Policy and the Department of Health and Human Services, in supporting and promoting text4baby.

**Text4baby in the Media**

*Texting Service Aims at Keeping New Moms and Babies Healthy*
On November 22nd, text4baby was featured in an article in San Diego State University’s public service broadcasting, KPBS. The piece introduced Jeanne Watson, a mother and text4baby user, and described her receptivity to the texting service, “It’s really to the point, and it just tells you what you should ask the doctor, so you can get an actual answer from a doctor, and not something on the Internet that could be true or not.” The article also highlighted the recent evaluation results from UC San Diego. One of the evaluators, Yvette LaCoursiere, commented, “What we found is [text4baby] actually opens a dialog. Three-quarters of women who used the service said that they’ve learned a piece of information, and they brought that information to their doctor, and started a discussion with them.” To read the full article, [click here](#).

**mHealth Highlight**

*Wireless Technology Helps Improve Healthcare*
A recent article on marketwire highlighted the benefits that mobile health products and services can have on the healthcare system in the United States. At a time when the number of Americans suffering from chronic diseases continues to rise, new technology is helping to improve patient well-being in an efficient and cost effective way. A recent CTIA and Harris survey found that 80% of doctors said that they wanted to see continued investment in mHealth as a way to improve and promote better healthcare. Wireless medical devices can be especially beneficial for people in rural and remote areas where it is often difficult to access quality healthcare. These mHealth solutions can help create consistency in healthcare by eliminating barriers to access. To read more, [click here](#).

**National Influenza Vaccination Week**
In observance of [National Influenza Vaccination Week](#), the Centers for Disease Control and Prevention (CDC) will host a live Twitter chat, December 8 at 1:00 pm EST. CDC professionals will address questions about the flu and the flu vaccine. Participate or follow this event on Twitter @CDCFlu, #NIVW.

**MCH Topics Webinar: Effects of Foodborne Illness on Pregnant Women and Newborns**
Join the National Healthy Mothers, Healthy Babies Coalition for our latest MCH Topics Webinar: Effects of Listeriosis on Pregnant Women and Newborns: An Hour with CDC’s Investigative Expert. The webinar will take place on December 15, 2011 from 1:30 – 2:30 pm Eastern Time. Our speaker, Dr. Benjamin Silk, will provide an overview of Listeria and listeriosis (Listeria infection) and explain why pregnant women, fetuses, and newborn infants are at higher risk. He will discuss listeria outbreaks in the United States, including the recent multi-state listeria outbreak caused by contaminated cantaloupes. He will also review how pregnant women can take steps to reduce their risk by learning what foods to avoid and how to safely prepare and store food. Dr. Silk is a CDC subject matter expert on listeriosis, and has 16 years of experience in public health disease tracking, disease investigation, and research to prevent and control infectious disease. Text4baby Initiatives for Partners

Legacy Camera Program
To help Outreach Partners document their text4baby promotional activities, lessons learned, and feedback from moms, HMHB has 10 Flip brand video cameras (very easy-to-use handheld camcorders) available for partners to borrow free of charge. We hope that this program will make it easier for our Outreach Partners to share their success with others around the country. To learn more about this program and how to borrow a camera, click here.

Text4baby Job Openings
Marketing and Communications Manager
The National Healthy Mothers, Healthy Babies Coalition is seeking an experienced project manager and creative marketing expert to serve as the Marketing and Communications Manager to drive the strategy behind and engagement of the diverse partner base for the text4baby service. This position is an opportunity for a motivated individual to be part of the senior management team of an innovative program where public health and mobile technology intersect. The ideal candidate will have demonstrated success managing multi-stakeholder initiatives and devising and implementing strategic marketing initiatives. Qualifications include 7-10 years of experience with proven track record of bringing together diverse partners to meet shared goals. This full-time, exempt position is based in Alexandria, Virginia. To read the full job description, visit http://www.text4baby.org/index.php/about/2-uncategorised/184. Interested candidates should email their resume or CV, cover letter, and salary history to hr@hmhb.org with “Marketing and Communications Manager” in the subject line. Qualified candidates will be contacted directly for interviews. No phone calls please.

Visit www.text4baby.org for more information about the campaign.

About text4baby
Text4baby is made possible through a broad, public-private partnership that includes government, corporations, academic institutions, professional associations, tribal agencies and non-profit organizations. Founding partners include HMHB, Voxiva, CTIA - The Wireless Foundation and Grey Healthcare Group (a WPP company). Johnson & Johnson is the founding sponsor, and the premier sponsor is WellPoint. U.S. government partners include the White House Office of Science and Technology Policy, the Department of Health and Human Services, the U.S. Department of Agriculture, the Department of Defense Military Health System and the U.S. Consumer Product Safety Commission. The mobile health platform is provided by Voxiva and free messaging services are generously provided by participating wireless service providers. Implementation partners include BabyCenter, Danya International, Syniverse Technologies, Keynote Systems and The George Washington University. MTV Networks is a media sponsor.
